DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-22, drawn to a liquid crystal composition and a liquid crystal element, classified in class 428, subclass 1.2.
 - II. Claim 23, drawn to an aromatic compound, classified in class 532, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together. Invention II is a compound used as an alignment promoter for liquid crystal compositions, and Invention I is a liquid crystal composition that uses an alignment promoter; however, the alignment promoter of invention I is not structurally related to the alignment promoter of invention II. An alignment promoter relies upon its chemical structure to influence the alignment of liquid crystal molecules. These inventions have similar functions; however, the structural differences between the alignment promoters in the two inventions would inherently result in different effects on the alignment of liquid crystal molecules within a liquid crystal composition.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Platon N. Mandros on June 27, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made. The Examiner was redirected to Roger Lee; however, communication regarding this matter could not be established.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
